The first screen you see

EARLIEST BUILD 7d48b3b · 23 Oct 2026

→

LATEST b729c59 · 26 Oct 2026

WHAT CHANGED

A plain top bar and a list of formats, with a status strip along the bottom.

Now a calm hero with the ESB Power Line · Ai Studio name, one launcher strip for Editorial, Graphics, Video and Open project, and recent projects.

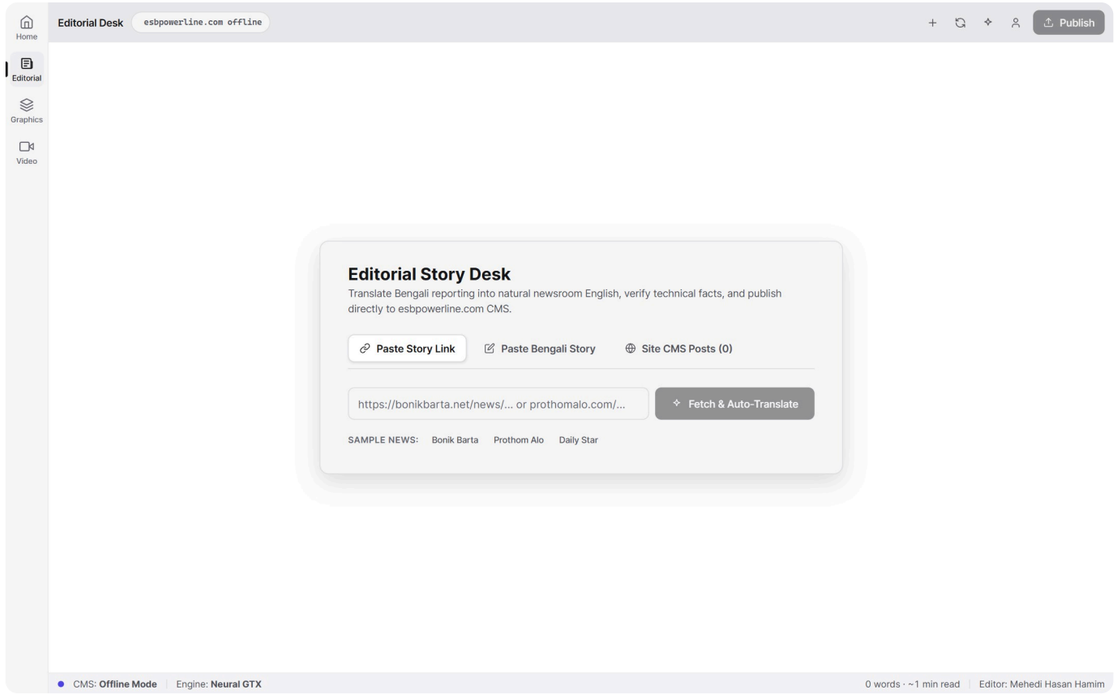

Light and dark backgrounds, frosted panels, and everything fits one screen with no scrolling.

Same window size (1440 × 900), same sample story. Earliest build = first commit of the repository.

02 Editorial · starting a story

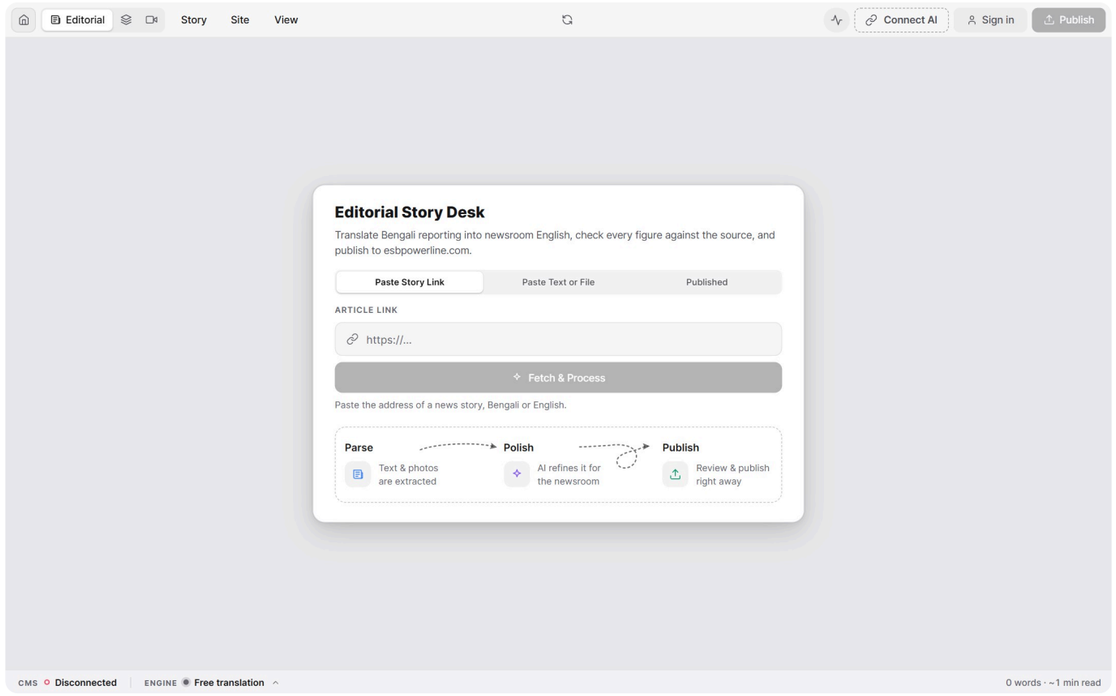

Where a story comes in

EARLIEST BUILD 7d48b3b · 23 Oct 2026

→

LATEST b729c59 · 26 Oct 2026

WHAT CHANGED

A small card with three tabs, one input and a row of sample links.

A fixed-size Story Desk that does not jump between tabs: a labelled link field, Fetch & Process, and the Parse → Polish → Publish steps.

Paste Text or File accepts PDF and Word (drag and drop anywhere); Published lists the site feed with desk colours; Continue a story shows three recent stories.

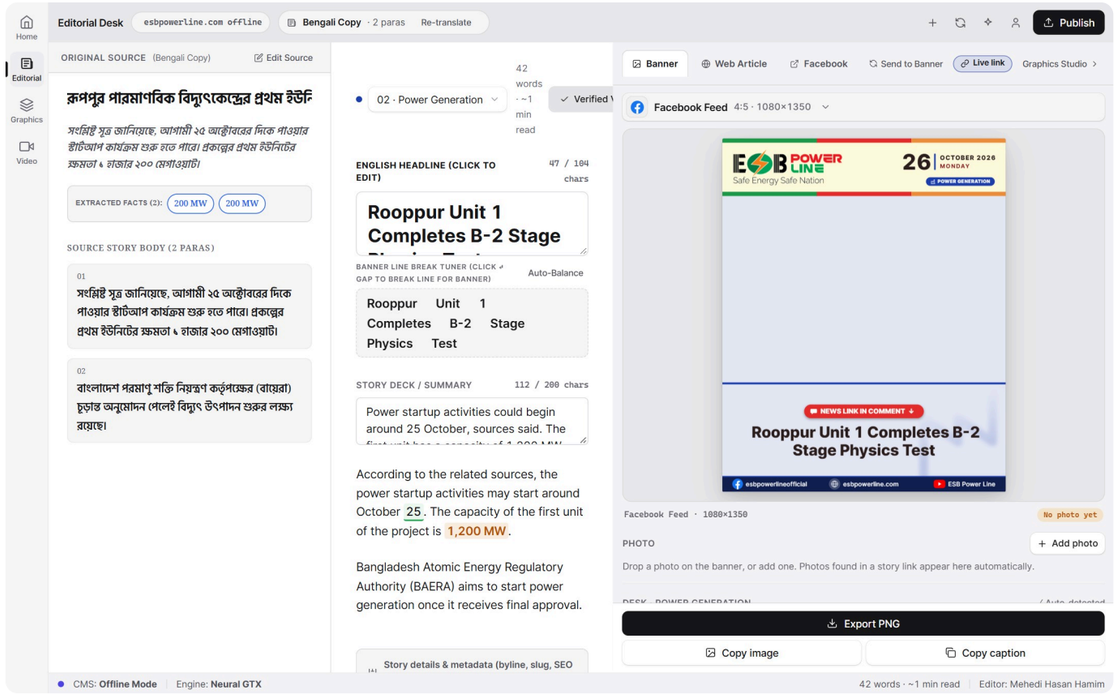

Same window size (1440 × 900), same sample story. Earliest build = first commit of the repository.

03 Editorial · the story desk

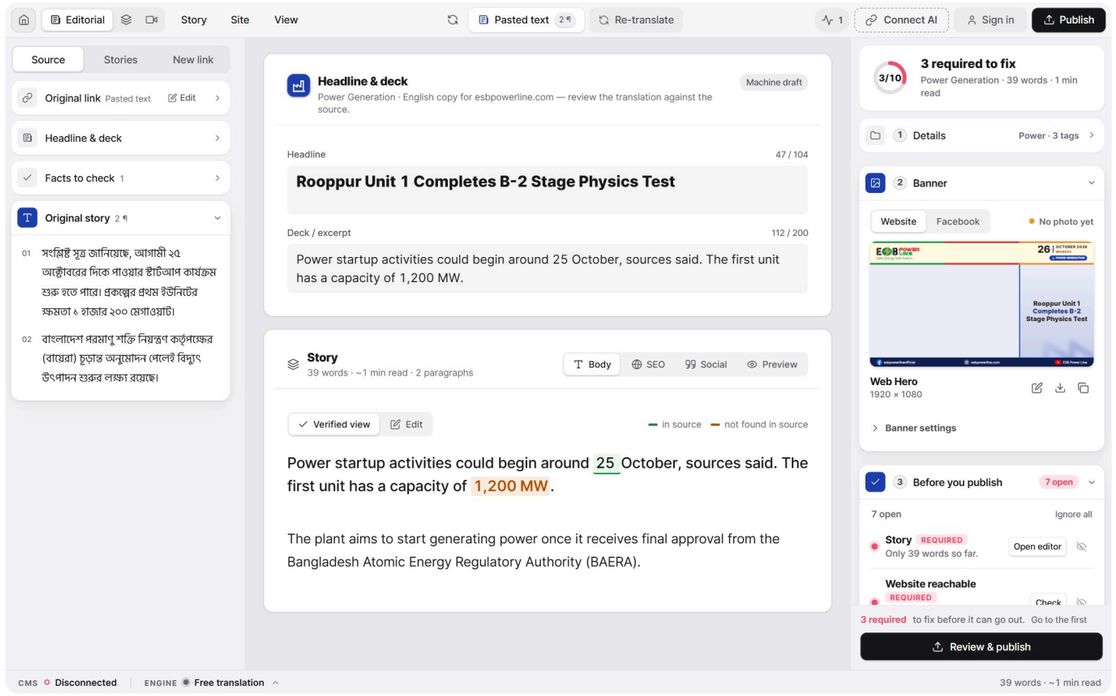

Checking and editing a translated story

ESB AI STUDIO · UI COMPARISON

EARLIEST BUILD 7d48b3b · 23 Oct 2026

LATEST b729c59 · 26 Oct 2026

WHAT CHANGED

Source, headline, deck and body in one narrow column; banner tools in a tabbed side panel.

Three clear zones: the original source on the left, the editable English story in the centre (Body, SEO, Social, Preview), and a publishing checklist on the right.

Figures are checked against the source, the AI chip and Engine footer show what is running, and a single Review & publish button closes the flow.

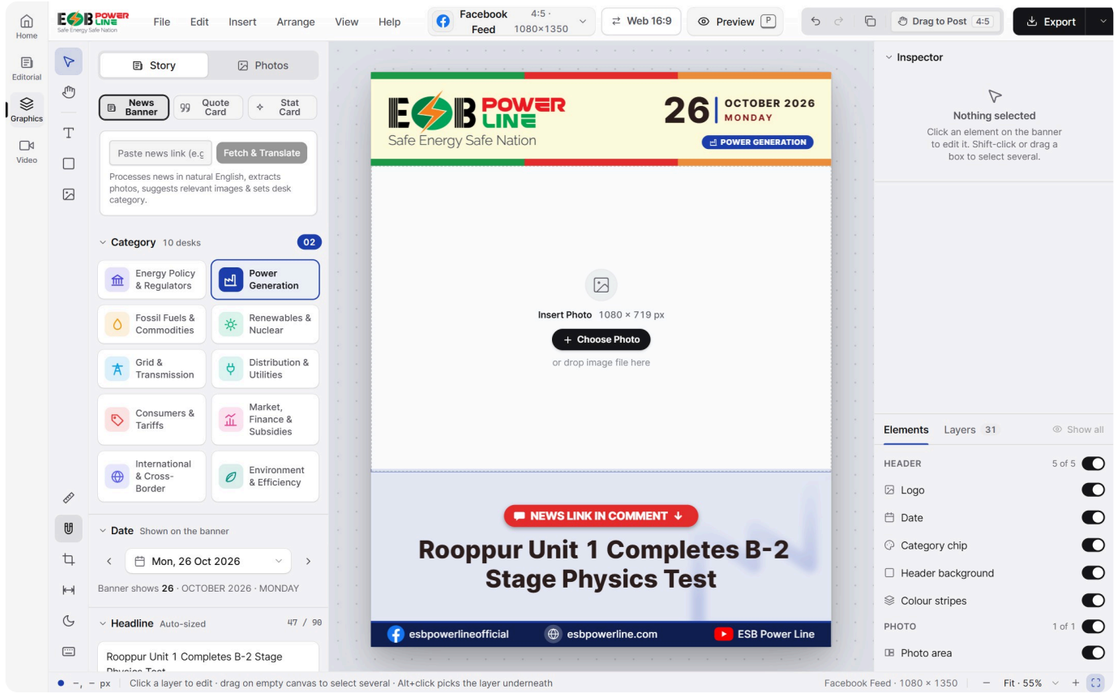

Same window size (1440 × 900), same sample story. Earliest build = first commit of the repository.

04 Graphics

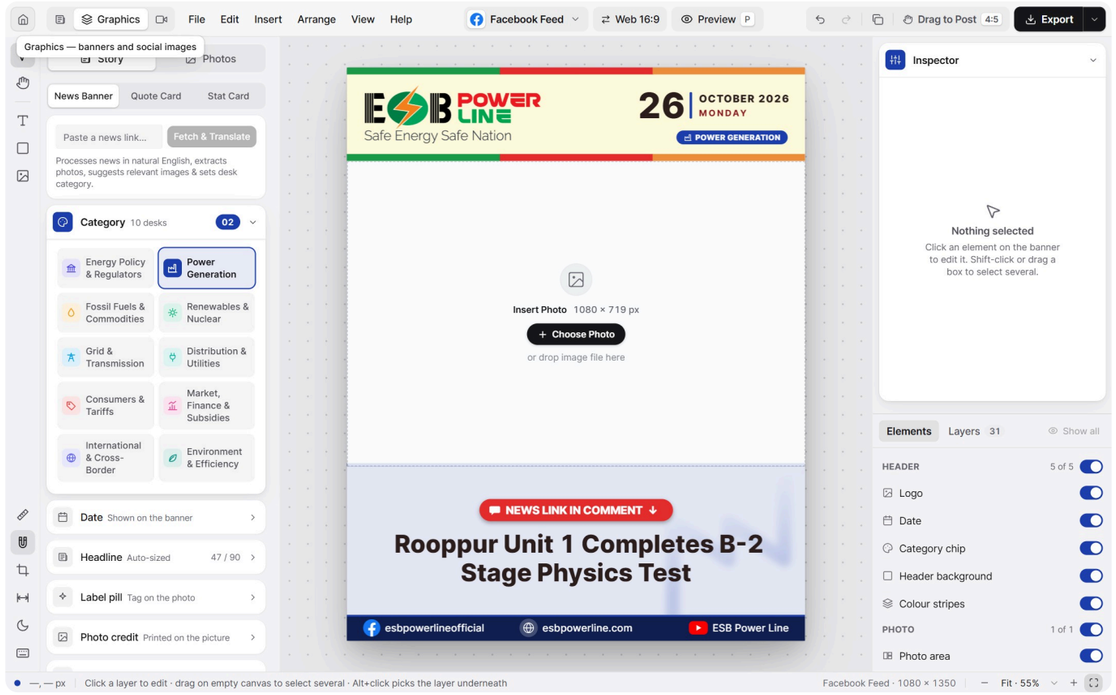

The banner studio

ESB AI STUDIO · UI COMPARISON

EARLIEST BUILD 7d48b3b · 23 Oct 2026

LATEST b729c59 · 26 Oct 2026

WHAT CHANGED

A dense three-column editor with a vertical desk rail on the far left.

The desk switcher moved into the header beside the menus; tabs glide on one spring; the Inspector card runs down to the Elements list.

A consistent header, side panels and status bar shared with Editorial and Video.

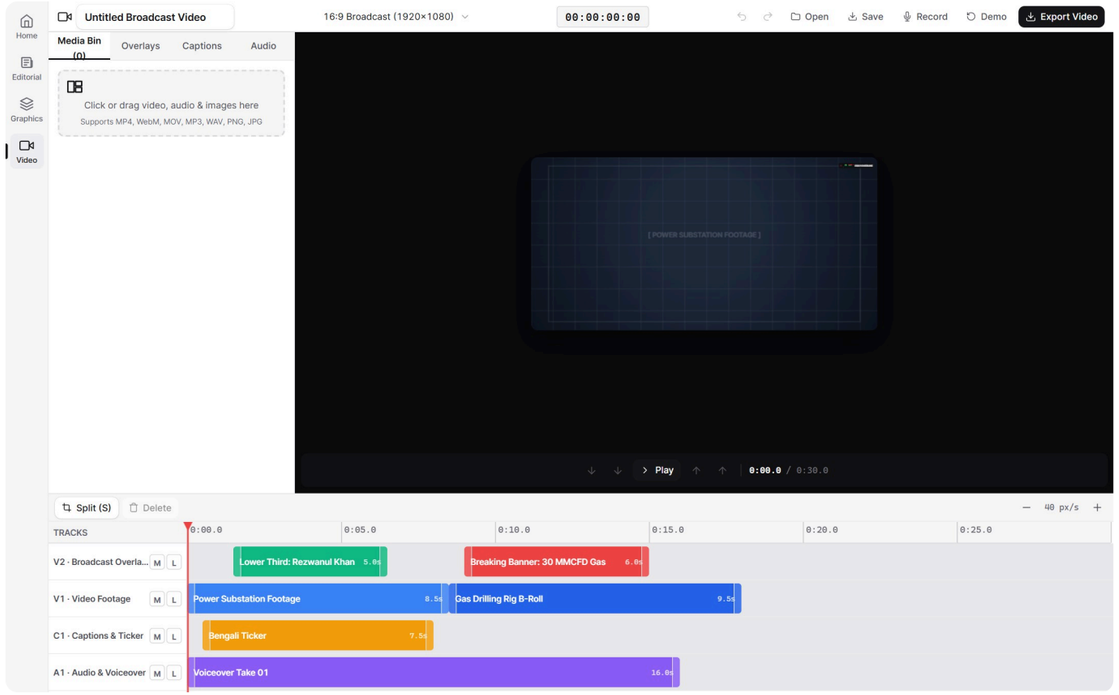

Same window size (1440 × 900), same sample story. Earliest build = first commit of the repository.

Video

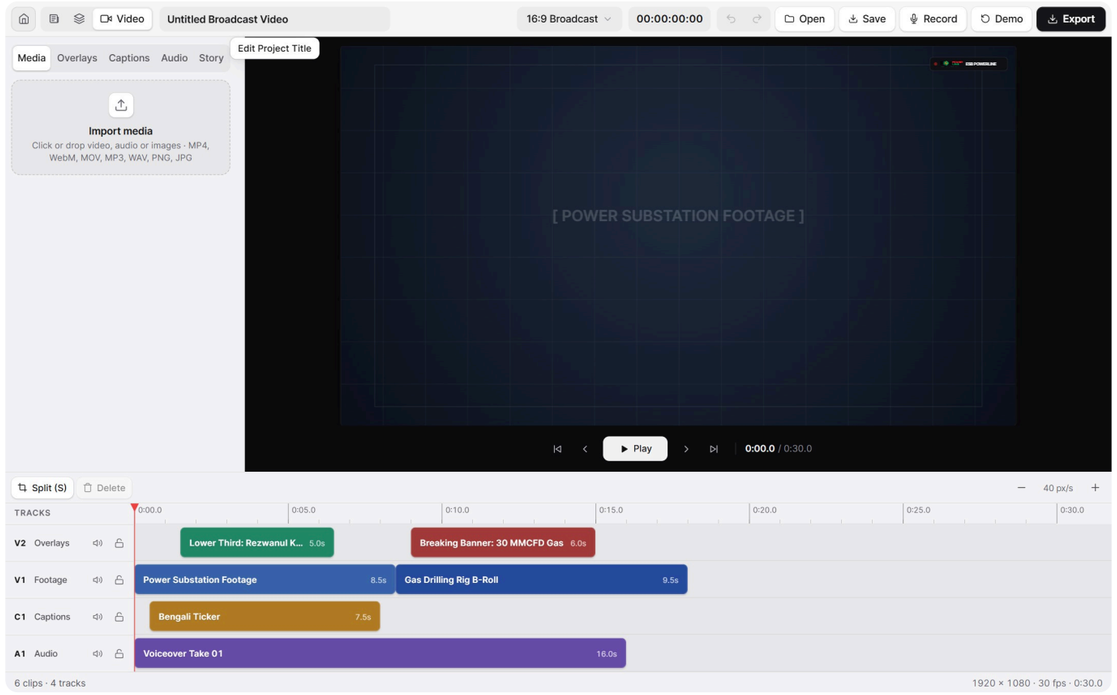

The timeline

EARLIEST BUILD 7d48b3b · 23 Oct 2026

→

LATEST b729c59 · 26 Oct 2026

WHAT CHANGED

Media tabs showed counts and the clip tracks used letter buttons (M, L).

The same chrome as the other desks: shared tabs, a status bar, named mute and lock icons, one-second ruler ticks and a readable transport bar.

Header controls share one height, and the desk now arrives with the same soft spring motion as the tabs.

Same window size (1440 × 900), same sample story. Earliest build = first commit of the repository.
